

Centre County Government, through the Department of 9-1-1, subscribes to an emergency communications network known as OnSolve. OnSolve CodeRED is a mass notification system used to alert the public about high level situations or incidents that may impact your safety. This system allows large numbers of people to quickly receive targeted emergency notifications. Thousands of messages sent simultaneously. When seconds count, you can rely on CodeRED to notify you if your jurisdiction experiences any situation that requires immediate public awareness.

Centre County 911 is used for:

- Missing Persons
- Escaped Inmates
- Criminal Activity
- Emergency Evacuation Notices
- Set-up/location of emergency shelters
- Bank Robbery
- Active Shooters
- Power Outages

How does it work? It is based on the location of the incident -- where the incident is taking place. Those who live within the targeted area of the incident (*radius or circumference chosen by the activating authority*) will receive the emergency message. If you live outside of the targeted area, you will **not** receive an alert. Note: In order to receive emergency notifications, you must enroll in CodeRED.

We encourage you to take action and register today. You will need to provide your home address and phone number for this free service. Enrollment into the program is completely voluntary.

How to enroll? Click here: [ENROLLMENT PAGE](#) to go directly to the sign up page on our website. We also have a Text to Enroll option: text CENTRECOUNTYALERTS to 99411 to receive a direct link to the enrollment page.

A better and most preferred option is to download the APP from the Google Play Store on your mobile device – it's free! We strongly recommend the App. It was designed for the traveler, to keep users safe & informed while on the go across the state or country. But we found by using it, you will be notified of alerts in your area, and the areas in which you are traveling through across the state or country. Hint: *you must turn on your navigation tool/app on your phone for this to work.*
